

# AutoTap

## Automotive Diagnostic Scan Tool

## OBDII Computer Based Scanner

The AutoTap scan tool connects the special OBD II plug-in-port on or under the dash of your car or light truck to your computer. The AutoTap scanner then translates the signals from your vehicle's computer-controlled sensors to easy-to-read visual displays.

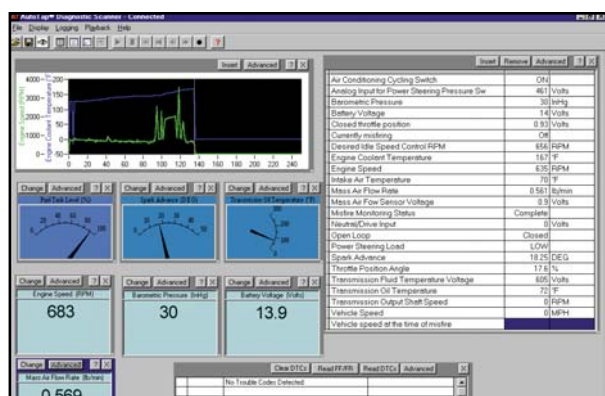

Did you know that your car provides data for hundreds of sensor readings? Just choose which of these parameters you want to see and whether

you want to view them in tables or as graphs, meters or gauges. Set your own ranges and alarms and even pick your own colors! Once you've got a screen configuration that works for you, save it with a couple of keystrokes. Save as many different screen configurations as you need... for different vehicles, or perhaps one for major maintenance, one for tuning, one for quick checks at the track. Now you've got a powerful tool!

**Track quick-changing parameters** like RPM and O2 Sensor readings at rates up to 40 times a second. View your results in English or Metric.

**Log a dyno or track run** with AutoTap's proprietary data logging feature. Then replay the file to review your vehicle's performance; transfer it to a spreadsheet for analysis; or email it to a friend to compare your performance to his.

**Turn off the Check Engine light.** Did you know something as simple as a loose gas cap can make your trouble light come on? Use the AutoTap scanner to retrieve trouble codes and their descriptions and reset your Check Engine light. You might just save big bucks by avoiding a trip to the dealer!

### Windows Based Software features:

- Cool new graphics
- Choose from multiple authentic gauge styles
- New, highly configurable screens for viewing an unlimited number of gauges, graphs and meters
- Add tables, graphs and gauges on the same screen
- Configure and save screens while not connected to your vehicle
- Log and playback data, or export to a spreadsheet
- Fast updates, over 40 parameters per second on some vehicles

# AutoTap

## Automotive Diagnostic Scan Tool

- **Quick Troubleshooting** – Do away with that uneasy feeling you get when the Check Engine light comes on. AutoTap will read the Trouble Codes that turned on your Check Engine light. And you'll get more than just a code, AutoTap also displays the code description in language you can understand.
- **Diagnose Bad Sensors** – Don't be a parts-swapper! The Trouble Code is just the starting point of your diagnosis. These codes point to specific sensors or systems. Unlike code reader tools, AutoTap lets you intelligently diagnose problems by showing actual sensor values. Use this info to diagnose whether the part has failed or not, saving you money on unneeded parts.
- **Turn off the Check Engine Light** – Once your repair is complete, turning off the Check Engine light is just a click away. Using the AutoTap scanner will save you time and money on every repair.
- **File Logging and Playback** – Nothing is more frustrating than trying to diagnose an intermittent problem. AutoTap allows you to log sensor values to your PC or PDA and capture those intermittent problems in action.
- **Supports Manufacturer Enhanced Data** – AutoTap supports much more than most OBDII scantools. In addition to generic data for all vehicles, AutoTap also supports manufacturer's enhanced powertrain data for Ford, GM and Chrysler.\*
- **Powerful Displays** – AutoTap features the most adaptable displays of any scantool. Text, Graphs and Gauges. Multiple screens can be configured with a mix and match of all display types.
- **Save multiple configuration files** – With so many powerful methods of displaying data, you'll want to make use of them all! Setup and save different displays for different cars, driving conditions.
- **Save DTC and Freeze Frame information** – Eliminates guesswork. Share the data with other DIY'ers or your mechanic for help making a diagnosis.

### System Requirements

- Recommend Pentium 233Mhz or better (or equivalent AMD processor)
- Windows 98, ME, 2000 or XP
- 50 Meg of free hard drive space
- 32 Meg RAM
- CD-Rom Drive (Only used for installation)
- USB Port

## How To Order

For your convenience, we offer two different ways to place your Autotap Tools order:

- Visit our web site at [www.diagnosticinnovations.com](http://www.diagnosticinnovations.com)
- Call **1-248-200-0400**

Order the complete kit with part number [Autotap-KIT](#)
